The screenshot displays the Wazuh dashboard's 'Incident response' section. It includes a search bar, filters for 'All' and 'Last 3 hours', and buttons for 'Show dates' and 'Refresh'. A 'Alert groups' section shows a donut chart with categories: Connection blocked (blue), Process stopped (orange), File quarantined (green), Maliciousness reported (red), and Virus captured (purple). An 'Events' section shows a bar chart of 'Events per day' from May 19, 2020, to May 25, 2020, with a total of 3,527 hits. Below the charts is a table with columns: Time, agent name, rule group, rule description, rule level, and raw id. The table lists five events related to connection blocking, process stopping, file quarantining, and maliciousness reporting.

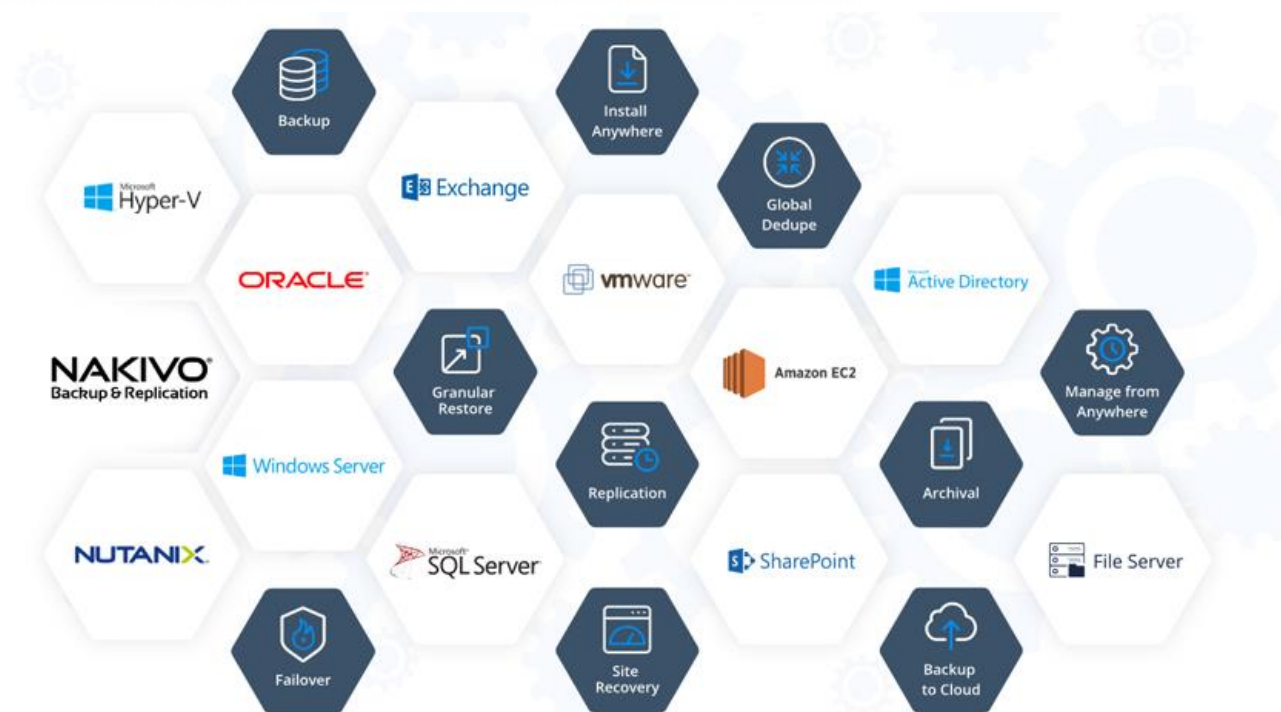

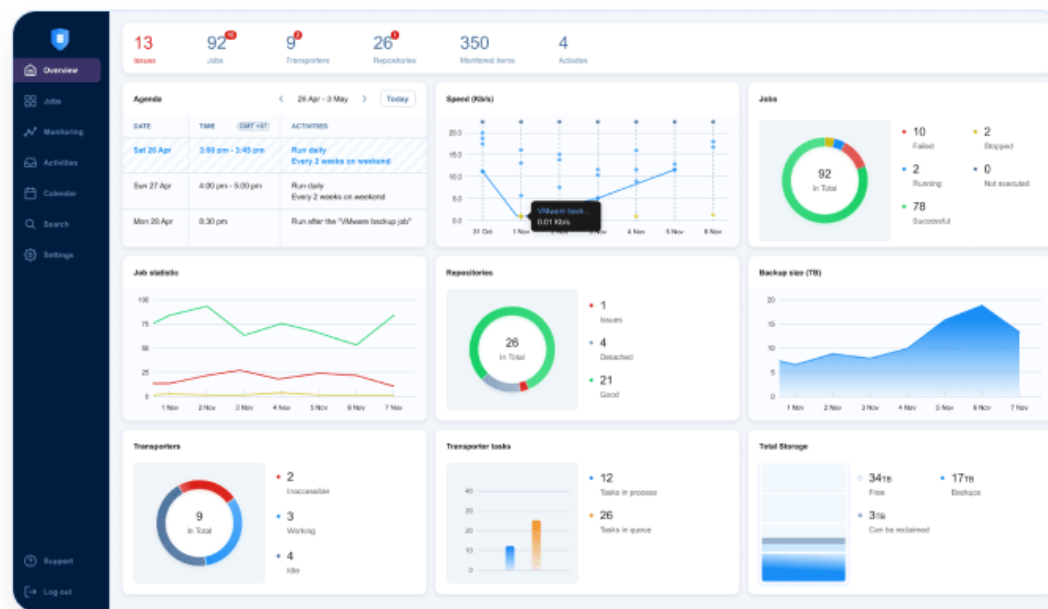

Time	agent name	rule group	rule description	rule level	raw id
May 19, 2020 @ 17:11:38.159	HOST1	Connection blocked	RDP connection IP Address 206.50.42.50 blocked by Firewall	10	100109
May 19, 2020 @ 16:10:15.719	HOST001	File quarantined	File C:\Users\michael\Documents\doc1.docx quarantined	10	100102
May 19, 2020 @ 01:14:38.167	HOST01	Process stopped	Encryption process Apsf\lsb\lsat stopped	10	100103
May 19, 2020 @ 01:14:38.169	HOST01	Application removed	Blacklisted .dll map-exact-4-10 removed	10	100100

Cibersegurança não é um problema a ser solucionado, mas sim uma condição a ser gerenciada!
